

Mercedes-Benz Metris Minivan

Slotted between the full-size Sprinter, and other types of smaller vans, the Metris has a refined design that is just right mid-size. The nimble Metris offers the cargo-carrying ability of larger vans, and/or the passenger carrying ability for up to eight people. This mid-size van provides the comfort, room, maneuverability, and connectivity you need for your time on the road. And a pleasant time on the road it will be with a 2.0-liter turbo engine, a seven-speed automatic, and rear-wheel drive. There's plenty of tech, too, including Crosswind Assist and load-adaptive stability control.

The Metris offers great fuel economy with great maneuverability - what a combination.

Business or pleasure - these vans can be configured for both.
